

TRAVELING AXLE 440B

THE NEXT GENERATION LANDOLL HAS ARRIVED!

The Landoll Trailer Line is taking a huge leap forward with the introduction of the all-new hydraulic operating systems, nicknamed H.O.S.S., and High Visibility Lighting package. The 440 and 455 "B" Series Traveling Axle trailers are the first models with these added standard features.

LOW CLEARANCE UPPER DECK TRANSITION

All 400 series trailers feature the super low clearance slope transition allowing man lifts, forklifts, and other difficult low clearance equipment to load easily on the upper deck.

ULTIMATE STABILITY

The four beam frame design is the backbone of a super versatile, solid piece of equipment. Wider main beams with a wider undercarriage, outboard tilt cylinder mounts, outer beam pivot points add superior stability while loading heavy loads.

POWDER COAT PAINT

Landoll is the only trailer manufacturer to offer powder coat paint on an entire trailer frame. The very durable finish provides excellent chemical and salt resistance while giving Landoll trailers a high quality, attractive appearance.

RAILROAD TRACK OPTION

The railroad track option is ideal for safely loading and transporting today's rail maintenance equipment.
